## APPLICATION FOR 2025 ICT INTERNSHIP PROGRAMME

Dear Rain Recruitment Team

I am excited to apply for the 2025 ICT Internship Programme at rain. As a soon to be graduate completing my Diploma in ICT (Application Development) at CPUT, I am eager to contribute to a fast moving tech company like yours and to grow professionally under the mentorship of industry leaders.

Throughout my academic journey, I have worked on projects such as mobile app UX design, Java based voting system and a sustainability focused web application. These have strengthened my skills in coding, Agile teamwork and solving business challenges with technology; all of which align well with the goals of your internship programme.

I am always ready to learn at every step, passionate about innovation. I am confident this internship will provide a strong foundation for my career and allow me to make meaningful contributions to your mission of redefining connectivity in South Africa.

Thank you for considering my application. I look forward to the opportunity to learn and grow with rain.

Yours Sincerely

Relebohile Brightness Molefe
